CONFERENCE PARTICIPANTS	ix
INTRODUCTION	
Liquid Scintillation Counting—Past and Present	
<i>C T Peng</i>	1
INSTRUMENTATION AND METHODS	
Instrumentation	
Remotely Controlled Field Measurement of Alpha, Beta, and Gamma Emitters in Water	
<i>J E Noakes, M P Neary</i>	11
Digital Pulse Shape Analysis in Liquid Scintillation Measurements After Continuous Chemical Separations	
<i>K Eberhardt, J Alstad, H O Kling, J V Kratz, G Langrock, J P Omtvedt, G Skarnemark, L Stavsetra, U Tharun, N Trautmann, N Wiehl, B Wierczinski</i>	19
Detection of Transactinides with α -Liquid Scintillation	
<i>Liv Stavsetra, Jon Petter Omtvedt</i>	25
A Microplate Scintillation Counter as a New Detector in High Performance Separation Techniques for Metabolism Studies	
<i>K O Boernsen, G J M Bruin</i>	35
Measuring Environmental Tritium Bound in Benzene Using a Single-Photomultiplier Tube LSC System	
<i>P Theodórsson, V Skripkin</i>	41
Calibration and Data Evaluation	
Evaluation of the Influence of Wall Effects on the Liquid Scintillation Counting Detection Efficiency for the Standardization of High-Energy Beta and Alpha Radionuclides	
<i>Philippe Cassette</i>	45
Determination of the Activity of Radionuclide Sources Emitting Beta and Gamma Radiation Using the CIEMAT/NIST Method	
<i>E W Günther</i>	57
Quench and Quench Curves	
<i>James Thomson</i>	65
Measurement of Gross Alpha & Beta Activities in Acid Leachates Using Alpha-Beta Discriminating Liquid Scintillation Counting	
<i>P E Warwick, I W Croudace</i>	75
Efficiency, Background, and Interference in Colored Samples Using an LSC Quantulus 1220	
<i>G Manjón, A Absi, M Villa, H P Moreno, R García-Tenorio</i>	83

Efficiency and Background in Cerenkov Counting Affected by Color Quenching: An Optical Study <i>G Manjón, A Absi, E Gómez, F Vaca, M García-León</i>	93
Generalized Efficiency Monitor for Liquid Scintillation Counting <i>Charles L Dodson</i>	99
Radionuclide Identification of Beta-Emitters by Energy Calibration in Liquid Scintillation Spectroscopy <i>Günter Schäfer, Ingrid Schäfer</i>	107
A Method to Obtain Spectra for Different Quench Index by Interpolation of Measured Reference Spectra <i>Markus Rettig, Christoph Wilhelm, Karl-Guenther Langguth</i>	115
New Software for Analyzing Complex Spectra Obtained with Ultra Low Level Liquid Scintillation Spectrometer 'Quantulus' <i>S V Malinovsky, I A Kashirin, A I Ermakov, V A Tikhomirov, A I Sobolev, L L Kaihola, A A Fedotov</i>	119
Mathematical Aspects of Decoding Complex Spectra Applied to Liquid Scintillation Counting <i>S V Malinovsky, I A Kashirin, A I Ermakov, V A Tikhomirov, S V Belanov, A I Sobolev</i>	127
Scintillators	
Development and Application of New Sol-Gel Based Scintillators <i>Ian Hamerton, John N Hay, John R Jones, Shui-Yu Lu</i>	137
The Effects of Substituted Anthracenes and Novel Scintillating Solvents in Cocktail Formulations for Alpha/Beta Separation Liquid Scintillation Spectrometry <i>Charles J Passo, Jr, Robert Anderson, Gordon T Cook, James Thomson</i>	141
Pico-Fluor™ MI – A New Cocktail for the Direct Counting of Biological Samples <i>James Thomson</i>	147
The Effect of Liquid Scintillation Cocktail Composition on Measurement Stability in the Assay of Solutions of ¹⁷⁷ Lu <i>Brian E Zimmerman</i>	151
The Effect of Alkaline Sample Solutions on the Stability of Liquid Scintillation Cocktails Prepared with Commercially Available Scintillants: Assays of ¹⁸⁸ W- ¹⁸⁸ Re <i>Jeffrey T Cessna, Brian E Zimmerman</i>	159
Performance of LSC Cocktails in Gross Beta Analysis of Drinking Water <i>C Kralik, F Vojir</i>	169
NATURAL RADIOACTIVITY	
Tritium	
Tritium in Natural Products <i>M P Neary, J E Noakes</i>	173
Meteorologically Induced Seasonal Variation of Tritium Concentration in Rain at Fukuoka, Japan <i>Noriyuki Momoshima, Yasuko Hayashi</i>	181
Natural Sparkling Water Sources Analysis Based on Tritium Measurements <i>Carmen Varlam, Ioan Stefanescu, Dumitru Steflea, Adrian Feru</i>	189
Determination of Tritium in Various Matrices by Liquid Scintillation Counting <i>Ursula D Hoepfener-Kramar, Cornelia Rittmeyer, Silvia Kuhn münchen</i>	197
Assessment of Tritium Detection Limits at Institute for Energy Technology (IFE) with Quantulus™ Low-Level Liquid Scintillation Spectrometer <i>Dag Ø Eriksen, Viggo Martini, Sven K Hartvig</i>	203

Low-Level Tritium Analysis Employing Micro-Tritium Enrichment <i>M P Neary</i>	213
A Revision of Counting Parameters of an Ultra-Low Background Liquid Scintillation Counter for Tritium Measurements Using Electrolytic Enrichment <i>Ll Pujol, M Fé Díaz</i>	221
Removal of Impurities from Environmental Water Samples for Tritium Measurement by Means of LS Counter—Application to Electrolysis Enrichment <i>Yoichi Sakuma, Yoshimune Ogata, Naruhito Tsuji</i>	227
Microwave Assisted Extraction in Combination with Liquid Scintillation Counting on In Vitro Percutaneous Absorption Studies of Clobetasol <i>L Hernandez, I Hernandez, L Ducat, E Casanova, N Diduk, X Perez, N De la Paz</i>	233
Radon and Radium	
Fast Methods for Field Analysis of Natural Radionuclides—New Approaches <i>S Möbius</i>	237
A Simple and Sensitive Liquid Scintillation Counting System for Continuous Monitoring of Radon in Water <i>P Theodórsson, G I Gudjonsson</i>	249
In-Situ Determination of Radon in the Air After Enrichment <i>T L Möbius Ramamonjisoa, S Möbius</i>	253
Fast Method of ²²⁶ Ra Measurement by Means of Alpha Spectroscopy and Its Comparison with Liquid Scintillation Counting <i>Stanisław Chalupnik, Antoni Mielnikow, Krystian Skubacz</i>	261
Determination of ²²⁸ Ra, ²²⁶ Ra, and ²¹⁰ Pb in Drinking Water Using Liquid Scintillation Counting <i>Gabriele Wallner</i>	269
Investigations on Instrumental Radium Analysis by Alpha/Beta LS Spectrometry <i>S Möbius, H Zeisberg</i>	275
Extractive Methods for Fast Radium Analysis <i>S Möbius, K Kamolchote, T Rakotoarisoa</i>	283
Natural Radioactivity in Drinking and Mineral Water <i>Urška Repinc, Ljudmila Benedik</i>	293
Determination of ²²⁶ Ra from Rock Samples Using LSC <i>Paula Juntunen, Aino Ruutu, Juhani Suksi</i>	299
Quality Assurance in Radium Measurements – Long-Term Experience with the Liquid Scintillation Spectrometry <i>Stanisław Chalupnik, Antoni Mielnikow</i>	303
Lead, Uranium and Others	
Sampling of ²¹⁰ Pb in Radon-Bearing Drinking Water <i>Pia Vesterbacka, Ilona Mäkeläinen</i>	317
Natural Radioactivity in Surface Waters in the Right-Side Tributaries of the Ebro River (Northeast Spain) <i>Ll Pujol, J A Sanchez-Cabeza</i>	327
Determination of Total Alpha Radioactivity of Thorium and Uranium Radionuclides in Fallout Using α/β LSC <i>Henryk Bem, Piotr Wieczorkowski</i>	335
Rapid Determination of ²¹⁰ Po and ²¹⁰ Pb (Via ²¹⁰ Bi) in Air Filters Using Alpha Spectrometry and Cerenkov Counting <i>C J Dale, A A Dale, P E Warwick, J E Rowe</i>	343

APPLICATIONS IN NUCLEAR TECHNOLOGIES AND ENVIRONMENTAL SURVEY

Plutonium

A Rapid Procedure for Determining $^{239+240}\text{Pu}$ and ^{241}Pu in Environmental Samples Using α/β LSC <i>J Eikenberg, S Bajo, M Ruethi, C Gann, H Beer, G Butterweck</i>	351
Study on the Method of Determining ^{241}Pu in Environmental Samples <i>Andrzej Komosa</i>	363
Measurements of ^{90}Sr and ^{241}Pu in Various Matrices <i>Jerzy W Mietelski, Paweł Gaca</i>	373
Determination of Alpha/Beta Radionuclides in Concentrated Salt Brines from Fuel Leaching by Liquid Scintillation Spectrometry Using Solvent Extraction <i>Yu Verzilov, H Curtius, J Fachinger</i>	379

Strontium and Others

Determination of ^{90}Sr by Extraction Chromatography in the Presence of ^{210}Pb in Environmental Samples <i>Ritva Saxén</i>	389
Sequential Radiochemical Separation of ^{90}Sr and ^{99}Tc in Aqueous Samples and Measurement by Liquid Scintillation Counting <i>Myung-Ho Lee, Kun-Ho Chung, Chang-Woo Lee</i>	397
Environmental Analysis Using Novel Separation Techniques and Spectrometers Based on a Low-Background LS Counter <i>A I Ermakov, S V Malinovsky, I A Kashirin, V A Tikhomirov, A I Sobolev, V B Rybalka, V V Serbinovich</i>	405
Application of Extractive Scintillator Resins to Quantification of Beta-Emitting Radionuclides in Aqueous Solutions <i>Timothy A DeVol, John D Leyba, James E Roane</i>	415
Construction of a Liquid Waste Monitor Using the Cerenkov Technique for Nuclear Medicine <i>H Fujii, K Matsuno, M Takiue</i>	425
Localization of Depleted Uranium Contamination <i>E Frenzel, S Möbius, T Oikari</i>	429

APPENDIX

Pilot Intercomparison and Workshop for Radon and Radium in Water <i>S Möbius, L Salonen</i>	435
The Discovery of the Excitation of Liquid Biphenyl and Phenanthrene Fluorescence by Fast Electrons; Laudatio on the Inauguration of the German Society for Liquid Scintillation Spectrometry (DGFS) <i>S Niese</i>	447
